DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 34-38, drawn to a method of manufacturing a bubble jet type ink print head, classified in class 29, subclass 890.1.
 - II. Claims 39-46, drawn to a method of manufacturing a bubble jet type ink jet print head with forming a plurality of resistive heat elements, classified in class 29, subclass 832.

The inventions are distinct, each from the other because of the following reason:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as depositing and patterning a resistive element. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Robert E. Bushnell on 11/30/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
